FEATURES

Blank end station with user operation via the stylish and acclaimed Gardtec Contour Keypads in twin 7 segment LED and 32 character full English Text LCD format. (590 LED only)

8 fully programmable zones, offering the flexibility to easily cater for domestic and most commercial environments.

1 full set and 3 part sets, including silent part set options to cover any specific user requirement now and in the future.

Chime function that can be turned on or off by the user.

Keypads are backlit for night-time operation.

Separate full and part set exit times to meet your particular requirements.

150 log event memory to monitor system use.

Up to 7 user codes on 4 priority levels providing capacity for multiple user operation, master user can simply add or delete these as and when required.

Up to 2 remote keypads allowing user flexibility of keypad location.

ACE compatible, for the simplest form of setting, unsetting and part setting of the system via a purpose designed infra red keyfob. The keypads offer FREE ACE compatibility as standard, without compromising levels of security. Additional keyfobs are required.

Personal Attack activation available through the keypads.

Full system can be tested by the master user for complete peace of mind.

3 Programmable terminals.

1 common / global tamper to detect compromise of the system.

Separate bell tamper to detect compromise of the external sounder.

Duress codes for all users.

Onboard communicator for signalling and interrogation purposes.

Upload / Download compatibility, the most advanced software available today allows the installation engineer full system remote management capabilities to immediately rectify any issues and increase service levels. Remote access by user authority.

Novagard Active compatible: Engineer can remotely check the condition of all components of the External Sounder to guarantee continued operation - never before obtainable.

The Gardtec 590 Control Panel series provides extensive features to meet and surpass your security requirements.

It is however the compatible communication facilities, internationally accredited and exclusive, that for the first time enable improved service levels for end users and ensure continued operation of all elements of your security system.

APPLICATION:

8 programmable zones plus the extensive feature list detailed here, provide more than sufficient capacity for domestic and small to medium commercial installations. The onboard communicator provides full signalling capabilities without the need for additional hardware, even if this is not required upon installation the option to upgrade in the future is always there.

Compatible with the most advanced Upload / Download package available today also allows immediate service response. New user options also provide for security managers or equivalent to remotely monitor system usage and change codes, preventing the need for travel to site. These functions are optional and set up by the engineer.

ACE OPTIONS

Gardtec ACE (Advanced Control Equipment) is compatible with all of the Gardiner Technology control panel range. This allows for the simplest form of security system operation - by just the press of a button. This is achieved through an attractive keyfob and secure infra red transmission.

ACE utilises the highest form of security and with up to 14 keyfobs per system, it's ideal for commercial and domestic premises.
